**Product Description**

**Sika®-1 Waterproofer** is an aqueous solution containing complex colloidal silicates. In the presence of water these swell and block the capillaries and pores in the applied sand cement renders, screeds and mortar to provide an effective water barrier against the transmission of liquid water.

**Sika®-1 Waterproofer** can be used alone as an admixture or as a waterproofing system when used in conjunction with the Sika®-1 Pre-Bagged, Spritz, Render, Screed and Finishing Mortars.

**Benefits**

- Proven for more than 100 years
- BBA Approved system.
- Pre batched system mortars available
- For brick, concrete and stone substrates
- Compatible with OPC and SRC
- Can be applied against live water infiltration
- Wall render and screed application
- Can be used internally and externally

**Areas for Use**

- Basements and cellars
- Waterproofing of swimming pools and other water retaining structures.
- Waterproofing of vaults and tunnels.
- Concrete, brick and structural blockwork.

**Limitations**

- Puncturing the system can compromise its integrity.
- Do not expose to frost while curing.
- Allow Sika®-1 Pre-bagged waterproofing render system to sufficiently dry before overcoating.
- The structure and its elements must be capable of withstanding the developed water pressure and other anticipated loadings without cracking or delaminating.
- Advice should be sought from independently qualified personnel with knowledge of the structure and local ground conditions.
- Never score or scratch and of the Sika®-1 waterproof coats to provide a key.
- Do not use gypsum based plaster over Sika®-1 system. Refer to plaster manufacturer for advice on suitability of a product for use in waterproof works.
Surface Preparation

WALLS/BRICK:
All existing treatments shall be completely removed and the exposed surfaces roughened by mechanical or water blasting techniques, followed by washing down and brushing to ensure full removal of all loose material. Mortar joints should be bonded and sound. Any defective mortar joint should be raked out to a depth of 12.0mm and repointed using Sika®-1 Finishing Mortar made up with clean water.

WALLS/CONCRETE:
All laitance shall be removed to expose coarse aggregate by mechanical or water blasting techniques. On new concrete walls Sika® Rugasol® MH Concrete Retarder can be applied to the face of the shuttering followed by wire brushing and washing of concrete surfaces.

FLOORS/GENERAL:
All existing treatments shall be completely removed and the exposed concrete floor mechanically prepared, washed down and brushed to ensure full removal of all loose debris to give an exposed aggregate finish, free of laitance, and surface contamination.

Application

Wet down prepared areas immediately prior to use. Sika®-1 pre-bagged mortars must be mixed using a forced action mixer or in a clean drum using a drill and paddle mixer. Tumble mixers are NOT suitable.

Sika®-1 Waterproofing System – Dilute 1ltr of Sika®-1 with 10ltrs of clean fresh water. Add fresh solution to the appropriate grade of Sika®-1 Pre-bagged Mortars at the required rate. See Sika®-1 pre-bagged Mortars data sheet for full details.

Sika®-1 Waterproofer for general use – in renders screeds and concrete, dilute 1ltr of Sika-1 Waterproofer with 10ltrs of clean fresh water. Add fresh solution to dry mix to required consistency.

In common with all cement based mixes, mortars and concretes must be prevented from rapid drying out. Keep moistened for a minimum of 7 days and protect from heat and frost.

Health & Safety
Consult MSDS for full list of hazards.

Storage
Protect Sika®-1 Waterproofer from frost and store between 5°C and 20°C

Shelf Life
12 months from date of manufacture when stored according to manufacturer’s instructions.
The technical data contained herein is based on our present knowledge and experience and we cannot be held liable for any errors, inaccuracies, omissions or editorial failings that result from technological changes or research between the date of issue of this document and the date the product is acquired. Before using the product, the user should carry out any necessary tests in order to ensure that the product is suitable for the intended application. Moreover, all users should contact the seller or the manufacturer of the product for additional technical information concerning its use if they think that the information in their possession needs to be clarified in any way, whether for normal use or a specific application of our product. Our guarantee applies within the context of the statutory regulations and provisions in force, current professional standards and in accordance with the stipulations set out in our general sales conditions. The information detailed in the present technical data sheet is given by way of indication and is not exhaustive. The same applies to any information provided verbally by telephone to any prospective or existing customer.
